

JARCO one-year Warranty Policy

JARCO'S one-year Warranty is in effect from the time you take delivery of your truck until the end of the 12th month following delivery and provides warranty coverage as outlined below. However, for as long as you have your JARCO bobtail in service, JARCO is here to help you with any problems that you may encounter in any way that we can.

First and foremost rest assured that if a problem arises from a defect in materials or workmanship in the tank unit that JARCO will correct the problem in a satisfactory and expeditious manner.

New Components:

New components are those parts of the tank unit that were supplied new by **JARCO** at the time of fabrication (i.e. valves, gauges, hoses, and can include meters and pumps if so supplied, etc.). If a New Component fails due to defect in material or workmanship during the one-year Warranty time period then **JARCO** will replace it with a new or rebuilt (at JARCO's discretion) component at no charge. **JARCO** will perform the repair if the truck is brought to our facility, or pay an authorized* repair company to complete the repair.

JARCO fabricated components:

JARCO fabricated components (i.e. deck, fenders, piping, etc.) are warranted to be free from defects in material or workmanship during the one-year Warranty time period. If a **JARCO** fabricated component fails due to defect in material or workmanship during the one-Year Warranty time period then **JARCO** will replace it with a new or rebuilt component at no charge. **JARCO** will perform the repair if the truck is brought to our facility, or pay an authorized* repair company to complete the repair.

Components rebuilt by JARCO:

Components rebuilt by **JARCO** (i.e., internal valve, pump, meter, etc.) are warranted to be free from defects in materials and workmanship during the one-Year Warranty time period. If a component rebuilt by **JARCO** fails due to defect in material or workmanship during the One-Year Warranty time period then **JARCO** will replace the part that caused the failure or supply another rebuilt part or component at no charge. **JARCO** will perform the repair if the truck is brought to our facility, or pay an authorized* repair company to complete the repair.

The remainder of the **JARCO** tank unit is covered during the one-year Warranty time period by our implied warranty of correcting any defects that you might encounter during its operation.

Warranty Procedure

This warranty requires that the user contact JARCO before attempting to make repairs, contracting to have repairs made or replacing a possibly defective part or component. JARCO will make arrangements to immediately repair or replace the defective component or, at JARCO's discretion, make arrangements to have the defective part or component repaired or replaced by a repair service company* authorized by JARCO.

***Only JARCO can authorize warranty repair(s) performed by another company. Repairs made by another company without prior written authorization from JARCO may not be covered.**

Immediate telephone contact to **JARCO** is required so that we can make arrangements to send replacement part(s) or components as soon as possible and keep your truck down time to a minimum.

Exceptions to the above policy can only be authorized from **JARCO, INC.**, Salem, IL.

JARCO shall not be liable for loss, damage, delay, or failure of delivery resulting from fire, strikes, riot or civil commotion, inability to obtain materials, casualties, delays in transportation, or any other cause beyond our control, nor liable for consequential damages from any cause whatsoever. This warranty does not cover damages incurred due to misuse, abuse, neglect or failure to perform required maintenance.

This product is designed for Liquid Petroleum Gas. It is the responsibility of the operator not to exceed the Chassis Manufacturer's Gross Vehicle and Axle Weight Ratings. It is also the responsibility of the operator not to exceed the Federal D.O.T. and/or local maximum allowable weights.
